ECON GEEK TURNED CODER

PROFILE

Founded and designed WarpMeta, an organization managing competitive esports tournaments. I personally hired and managed a team of engineers, while scaling the platform to over 1,000 active gamers. I'm especially interested in esports/gaming, as well as education and media. Now, I'm looking to apply my hands-on experience by diving deep into the code and helping to build great products.

EXPERIENCE

CEO/FOUNDER

WarpMeta (2016 - Present)

- Managed new website development work
- Wireframed new website using Moqups
- Built new website using Java framework and AWS
